Introduction

This PDF outlines the video specification provided for the Main Stage at Jelling Music Festival 2026. It contains all relevant technical information available to visiting artists and their production teams regarding video, control, and system infrastructure for their shows during 21. - 24. May 2026. The document details the supplied screens, control and network setup, positions, and configuration. It also describes the available crew and system support on site.

This specification should be used as the technical reference when advancing and preparing artist shows for the Main Stage.

| Count   | LED List                               | Nits      | INFO      |
